## A113. OBSOLETE SERVICE OFFERINGS - MISCELLANEOUS SERVICE ARRANGEMENTS

### A113.1 Group Emergency Alerting And Dispatching Systems

(Obsoleted September 30, 1979, Type D, Tariff Reference A13.)  
(See A113.1.2.C. also)

Obsolete, Type D, "Not available for new installations or on customer initiated transfers of service. When a Company-initiated change in a customer's serving central office occurs due to a dial to dial replacement, or area transfer, the equipment will not be relocated to the new central office."

Group Emergency Alerting and Dispatching Systems will be eliminated after February 28, 2003.

(N)

#### A113.1.1 General

- A. Group emergency alerting and dispatching systems are available in all dial central office areas to facilitate the making of concurrent emergency calls to a fixed group or groups of numbers (individual line subscribers) to obviate the need for making individual calls to each number.
- B. The Small and Twenty-Four Line systems are restricted to a single central office unit when operated with general exchange service.
- C. The Company will furnish all lines and equipment required for the Small group alerting and dispatching systems, consisting generally, in addition to regular exchange facilities, of a dispatching telephone or telephones at locations designated by the subscriber and connected by means of lines to special equipment located in the central office.
- D. The Twenty-Four Line Group Alerting system does not need a dispatching station as this function is handled by the equipment in the central office and regular exchange facilities of the called stations. All stations ring simultaneously when one of the listed emergency alerting numbers (maximum of two) is dialed. Any receiving station that is busy when an emergency call comes in will receive a "tone" signal. Upon terminating the call in progress, the receiving station will ring and the emergency call may be completed. A call to the second emergency alerting telephone number while the other one is in use will result in both calls being bridged to call receiving lines.
- E. The approval for connection of the individual subscriber's exchange line to the emergency alerting and dispatching equipment will be the responsibility of the subscriber and upon objection from the individual subscriber to such connection, the Company may disconnect the individual subscriber's line from the emergency alerting and dispatching equipment.

#### A113.1.2 Rates And Charges

The following rates and charges apply, which are in addition to regular charges for exchange service furnished to the alerted station line.

Regular rates and charges apply for business exchange service in addition to the following rates and charges.

- A. Small System - Limited to one dial central office area with a maximum capacity of 63 called lines.  
(Basic Termination Charge applies to 60 months)
  1. Common Equipment - either single or multigroup basis, maximum of three groups as follows.

	Monthly Rate	Basic Termination Charge	USOC
	\$-	\$-	NA
(a) Two or three groups of 21 alerting lines or less per group.			
(b) Two groups with a maximum of 42 alerting lines in one group and 21 alerting lines in the second group.	225.00	850.00	99V
2. Supplementary Items			
(a) Line equipment each called line	6.00	50.00	56Y

**A113.17.1 The Feature Package**

(Obsoleted January 9, 2004, Type B. Not available for new installations, additions or on transfers of service to a new location.)

**A. Description of Service**

1. **This feature package** provides a package of network features/services for residence customers.
2. The rate specified herein entitles a residence subscriber to unlimited use of the features/services specified following from the listed sections of this Tariff:

A13.9 Call Waiting Deluxe, Three-Way Calling, Call Forwarding Busy Line<sup>1</sup>, Call Forwarding Don't Answer<sup>1</sup> (with or without Ring Control), Star 98 Access<sup>1</sup>

A13.19 Caller ID-Deluxe, Call Return

A13.47 Message Waiting Indication<sup>1</sup>

A13.70 Privacy Director service

**B. Regulations and Limitations of Service**

1. **This feature package** is only available to individual line residence subscribers. A residence subscriber may select any suitable combination of the features/services listed in **A113.17.1.A.2**.
2. All rules, regulations and limitations specified in the Tariff sections listed in **A113.17.1.A.2** apply to the respective features/services requested as part of this package. Nonrecurring programming fees do not apply for features/services requested as part of this package.
3. All features/services are furnished only from central offices that have been arranged to provide these services. The features/services are provided subject to availability of facilities.
4. Service charges specified in Section A4. of this Tariff do not apply for transactions in which a subscriber only modifies an existing **unit of this feature package** by adding, deleting or changing features/services requested as part of the package.
5. Existing customers of **this feature package** can not take advantage of special promotions for **this feature package** or any of the features/services specified in **A113.17.1.A.2** preceding unless specifically allowed by the terms of the special promotion.
6. **This feature package** is not available with a line provided as part of any Complete Choice service or plan, a line specified in this tariff as Message Rate or Measured Service, or a line equipped with the BellSouth Essentials package.
7. **This feature package** can be suspended as specified in A2.3.16 of this Tariff. During the period of suspension, no recurring charge applies

**A113. OBSOLETE SERVICE OFFERINGS - MISCELLANEOUS SERVICE ARRANGEMENTS**

**A113.19 TouchStar® Service (Cont'd)**

**A113.19.2 Definitions of Feature Offerings (Cont'd)**

**A. Caller ID - Multi-Line (Cont'd)**

The following information is transmitted to the Caller ID - Multi-Line customer and displayed on the called CPE during the first long silent interval of the ringing cycle: calling Directory Number, time of day (hours and minutes) the call was received, and date (month and day) the call was received.

A service order is required to establish or discontinue Caller ID - Multi-Line. Subsequent to establishment, the feature can be activated and deactivated at the customer's discretion through the use of preassigned feature access codes.

Any customer subscribing to Caller ID - Multi-Line will be responsible for the provision of a display device which will be located on the customer's premises. The installation, repair and technical capability of that equipment to function in conjunction with the features described herein will be the responsibility of the customer. The Company assumes no liability and will be held harmless for any incompatibility of this equipment to perform satisfactorily with the network feature described herein.

If the incoming call is from a line equipped with RingMaster® service, the telephone number transmitted will always be the main number rather than any dependent RingMaster® service number.

If the incoming call is from a caller served by a Private Branch Exchange (PBX), only the main number will be transmitted and available for display.

If the incoming call originates from a Multi-Line Hunt Group, the telephone number transmitted and available for display will always be the main number of the hunt group unless the telephone number is Telephone Number (TN) identified.

Caller ID - Multi-Line is not available on operator handled calls.

**A113.19.3 Regulations And Limitations Of Service**

**A. The Following Limitations Apply:**

1. TouchStar® service is provided subject to the availability of facilities. Additionally, the features described will only operate on calls originating and terminating within TouchStar® service equipped offices. Also, feature screening lists can only contain telephone numbers of subscribers served out of TouchStar® service equipped offices.
2. The TouchStar® service basic features are available to single line and multi-line residence and business customers who have rotary dial or Touch-Tone service. Caller ID - Basic and Caller ID - Deluxe are available to single and multi-line residence and business customers. Effective March 15, 1995, Caller ID - Multi-Line which was available only for line side terminations equipped with hunting (grouping) arrangements will no longer be available to new customers. Call Tracking (BCLID) is not available for single line arrangements, but it is available for PBX and business multi-line customers. Neither Caller ID - Basic, Caller ID - Deluxe, Call Tracking (BCLID), nor Caller ID - Multi-Line can be provisioned for Basic 911 customers.
3. TouchStar® service basic features cannot be provisioned on toll terminals, trunks or some remote switching locations. (C)
4. Appropriate Service Charges apply except during Company selected periods of special promotion.
5. The Company will deliver all numbers, subject to technical limitations, including telephone numbers associated with Non-published Listing Service as described in Section A6. of this Tariff, unless the caller subscribes to and/or has activated Calling Number Delivery Blocking.
6. Optional Calling Number Delivery Blocking - Permanent is available upon request, at no charge to residential subscribers of Non-Published Listing Service as described in Section A6. of this Tariff and, to the following entities and their employees/volunteers, for lines over which the official business of the agency is conducted. This includes lines at the residences of employees/volunteers where the head of the agency certifies to local Company management a need for blocking based upon health and safety concerns: (a) Non-profit, tax exempt, private and public social welfare agencies such as domestic violence intervention agencies, (b) federal, state and local law enforcement agencies.
7. Calling party information via Caller ID - Multi-Line is not available on operator handled calls.

### A113.19 TouchStar® Service (Cont'd)

#### A113.19.3 Regulations And Limitations Of Service (Cont'd)

A. The Following Limitations Apply: (Cont'd)

8. The Company's liability arising out of the provision of any TouchStar® service feature, including but not limited to the delivery or non-delivery of calling numbers, is limited as set forth in A2.5 of this Tariff.
9. TouchStar® service features are not available on trunks except as specifically noted in 2. preceding.
10. Telephone numbers transmitted via Caller ID - Multi-Line are intended solely for the use of these subscribers. Resale of this information is prohibited by this Tariff, except the caller's numbers may be provided to the subscriber's client for those calls sponsored or provided by that specific client where the client's identity is disclosed to the caller and the client agrees not to distribute such information to others.

### A113.21 Reserved For Future Use

### A113.22 Reserved For Future Use

**Note 1:** Effective March 15, 1995, all existing Caller ID - Multi-Line customers may retain this service as specified in this section of the Tariff or change to the service provided under Caller ID - Basic or Caller ID - Deluxe as specified in A13.19 of this Tariff. If existing Caller ID - Multi-Line customers change or add to their existing service, then they will have to convert to Caller ID - Basic or Caller ID - Deluxe. Service charges from Section A4. of this Tariff shall not apply for such conversions. All new single and multi-line residence and business customers desiring a TouchStar® service calling information delivery feature will have to use Caller ID - Basic or Caller ID - Deluxe. Call Tracking (BCLID) is available for PBX customers as well as business multi-line customers.

**A113. OBSOLETE SERVICE OFFERINGS - MISCELLANEOUS SERVICE ARRANGEMENTS**

**A113.23 Reserved For Future Use**

**A113.24 Reserved For Future Use**

**A113.25 Extension Line Channels**

**A113.25.1 Reserved For Future Use**

**A113.25.2 Methods Of Applying Rates**

- A. Channels Between Buildings on the Same Premises  
(Obsoleted 01-01-87, Type D; available *solely at the discretion of the Company for new service, additions, or transfer of service where spare capacity is available in existing cable facilities. Channel service will be discontinued when associated cable facilities can no longer be economically maintained.*) (C)

These channels are provided to extend exchange, Centrex Type Services terminated in a non-button telephone to another building on the same premises or to extend communications systems such as PBX or Key systems to other buildings on the same premises.

Where the customer provides his own communication system, such as a PBX or Key system, the customer may provide the facilities required to extend the use of his system from one building to another on the same premises.

When all terminations are located on the same premises a mileage charge applies between buildings for the direct airline distance, determined in quarter mile increments (a fractional quarter mile being considered as a full quarter mile). For channels routed through the central office the charge is as stated in A13.25.2.A.1. preceding and charges apply as though the stations were located on different premises.

Where a supporting structure is necessary for the purpose of furnishing extension lines on the subscriber's premises, such supporting structure will be furnished by the subscriber as provided for "Construction on Private Property" in Section A5.

When the channel facility (wire or cable) placed is of sufficient length and/or the in-plant cost of the circuit (wire or cable) facility renders the monthly rate inadequate, the customer may be required to pay a monthly rate of 3 1/4 percent of the in-plant cost of the facilities placed.

If the Company considers it appropriate and compensatory, existing facilities may be rated at 3 1/4 percent of the in-plant cost of the facilities to determine a monthly rate. The facilities may be offered for sale to the customer.

**A113.28 Announcement Facilities**

**A113.28.1 General**

(Obsoleted 5-6-2002, Type D - Not available for new installations, moves or transfers. Existing customers may add service if facilities are available. Tariff Reference A13.)

Announcement facilities will be eliminated after February 28, 2003.

(N)

Announcement facilities are provided, where available, to the customer's premises for connection to electronic or electro-mechanical devices that provide recorded announcements to calling parties.

**A113.28.2 Rules And Regulations**

A. The Company will provide facilities, when available, for customers for their use in providing announcements by telephone to calling parties simultaneously, under the following conditions:

1. In order to permit the determination of the anticipated incoming call volume so that facilities of the proper capacity may be furnished, the customer is required to designate the kind of announcements for which the announcement service is to be used.
2. The customer will subscribe to adequate telephone facilities initially and subsequently as may be required, in the judgment of the Company, to adequately handle calls to announcement equipment without impairing the Company's general telephone service or telephone plant. The customer may be required further to bear the expense of traffic load protection equipment when, in the judgment of the Company, such would be required as a protection to the general telephone service or telephone plant during temporary periods of traffic overload to the announcement system. The traffic load protection equipment reduces the normal length of the announcement cycle.
3. Facilities shall be used for such announcements as may be desired by the customer, provided that the contents and length of such announcements shall be subject to the approval of the Company.
4. The Company will furnish said announcement facilities to its customers for use by such customers in providing announcements, only within the limits of the local service area serving the customer, including the limits of other local service areas having access to the location of the announcement facilities on a local service basis. This limitation is not intended to preclude the completion of any incoming sent paid long distance message calls placed to the announcement number.
5. Telephone users calling the announcement number are automatically disconnected after elapsing of time for one full announcement.
6. One directory listing without charge will be furnished with each service.
7. Facilities for announcement services will be furnished where all the necessary exchange facilities, as determined by the Company, are available.

**A113.28.3 Rates And Charges**

Louisville, Kentucky

EFFECTIVE: July 7, 1993

## **A113. OBSOLETE SERVICE OFFERINGS - MISCELLANEOUS SERVICE ARRANGEMENTS**

### **A113.39 Central Office Local Area Network Service**

(T)(M)

(Obsoleted July 7, 1993, Type B) Not available for new installations, additions or an transfers of service to new location, Tariff Reference A13.

(N)

#### **A113.39.1 General**

(T)(M)

- A. Central Office Local Area Network (C.O. LAN) service is a data communications network service providing for the interconnection of customer provided data devices and for the transmission of data between such devices.

(M)

1. C.O. LAN service is provided from specially equipped central offices and utilizes data switching technology, digital and analog transmission facilities and existing local facilities to provide switched data transport at speeds up to 19.2 Kilobits per second.

(M)

2. The primary component of C.O. LAN service is the C.O. LAN Data Switch located in the Company's central office.

(M)

- B. C.O. LAN service will support customer provided asynchronous data terminals and host computers and is capable of switching terminal to terminal, terminal to host computer(s) and host computer to host computer data traffic at speeds up to 19.2 kilobits per second.

(M)

1. C.O. LAN service also provides access to the telecommunications network via an optional modem pooling arrangement.

(M)

2. For customers served by more than one C.O. LAN equipped central office, private data networks may be established using private internodal trunks.

(M)

- C. The data switch located in a central office will not be dedicated to a single customer and may provide C.O. LAN service to more than one customer.

(M)

#### **A113.39.2 Regulations**

(T)(M)

- A. Central Office Local Area Network Service can only be provided from central offices equipped for C.O. LAN service subject to the technical limitations of such equipment and availability of suitable facilities.

(M)

1. Interconnection of C.O. LAN service is accomplished by a data switching facility located in the central office.

(M)

2. A customer may access C.O. LAN via a voice/data multiplexer located in the central office, or the public switched network via a modem pooling arrangement.

(M)

3. C.O. LAN service is capable of transmitting data at various speeds up to 19.2 Kbps depending upon the transmission characteristics of the facility and equipment used for such transmission.

(M)

- B. Voice/data multiplexers (VDMs) used in provisioning C.O. LAN service must be compatible.

(M)

1. The voice/data multiplexers located on the customer's premises will provide connections for station lines and data terminals. This voice/data multiplexer will transmit the data and voice signals simultaneously to the central office.

(M)

2. The voice/data multiplexer located on the customer's premises must be provided by the customer and be compatible with the central office voice/data multiplexer under the technical guidelines for C.O. LAN service. These technical specifications are found in BSS's Technical Reference 73509 or its successor.

(M)

3. The voice/data multiplexer located in the central office will separate the signals transmitting the voice to the voice switch and the data to the data switch.

(M)

4. The voice/data multiplexer offered under C.O. LAN service is available only for access to C.O. LAN service.

(M)

- C. Data is transmitted through C.O. LAN service to destinations designated by the customer.

(M)

## A113. OBSOLETE SERVICE OFFERINGS - MISCELLANEOUS SERVICE ARRANGEMENTS

### A113.39 Central Office Local Area Network Service (Cont'd)

(T)(M)

#### A113.39.2 Regulations (Cont'd)

(T)(M)

- D. Modem pool members are dedicated to a specific customer for access by the customer's designees only. Each modem pool member is equipped with an associated local exchange facility. The modem pooling capability offered under C.O. LAN service is available only for access to or from C.O. LAN service. (M)
- E. The customer is responsible for the distribution of access codes (e.g., passwords) to authorized users. (M)
- F. In addition to the C.O. LAN rates and charges in this Tariff, the customer is also responsible for all exchange service rates, local usage, toll and private line channels as well as all other applicable rates, charges and regulations included in this Tariff. (M)
- G. Suspension of all or part of C.O. LAN service requested by the customer is not permitted. (M)
- H. The voice/data multiplexer (VDM) feature of C.O. LAN is available on individual business and residence lines and on ESSX<sup>®</sup> service switched access facilities served out of a properly equipped central office located less than 18 Kilofeet in cable route distance from the subscriber with the service provisioned on non-loaded cable pairs. (M)

#### A113.39.3 Definitions

(T)(M)

##### ASYNCHRONOUS

(M)

An asynchronous transmission is one where each character is transmitted one at a time over a communications line using a start and a stop bit to flag the beginning and end of each character.

##### ASYNCHRONOUS PORT CONNECTION

(M)

An asynchronous port connection, for Central Office Local Area Network Service, includes use of C.O. LAN service common equipment, asynchronous interface modules, and switching within and between nodes located in the same serving central office.

##### INTERNODAL TRUNKING

(M)

Internodal trunking allows C.O. LAN service users to communicate with terminals or hosts connected to other nodes within the network via private data transmission facilities.

##### LOCAL CALLING AREA (LCA)

(M)

A Local Calling Area for C.O. LAN service consists of all C.O. LAN service nodes within the same LATA and within the same exchange calling area. A LATA may have more than one Local Calling Area.

##### MODEM POOLING

(M)

A Modem Pool consists of one or more modems with associated exchange facilities, and asynchronous ports, arranged in a customer-dedicated trunk group for either inward or outward C.O. LAN service data transmission. A modem pool member and its associated exchange facility are provisioned from the same central office as the serving C.O. LAN data switch. Modem Pooling is available at 300, 1200, and 2400 bps.

##### NODE

(M)

A Node consists of all C.O. LAN service common equipment, software, and interface modules required to provide switching and control functions for devices attached to that common equipment.

##### VOICE/DATA MULTIPLEXER

(M)

The Voice/Data Multiplexer (VDM) allows for the simultaneous transmission of both voice and data over an allowed exchange type facility.

#### A113.39.4 Payment Plans

(T)(M)

##### A. General

(M)

1. All of the service features listed in A13.39.5. following, may be placed under contract and rate stabilized at the current tariff rate for periods from 24 to 60 months. (M)
2. Except as modified herein, subscribers selecting the rate stabilized option are subject to the rules and regulations specified in Section A2. of this Tariff for Variable Term Payment Plans. (M)

PUBLIC SERVICE COMMISSION  
OF KENTUCKY  
EFFECTIVE

JUL 7 1993

SECTION 9 (1)

BY: Charles H. Miller  
PUBLIC SERVICE COMMISSION MANAGER

## **A113. OBSOLETE SERVICE OFFERINGS - MISCELLANEOUS SERVICE ARRANGEMENTS**

### **A113.39 Central Office Local Area Network Service (Cont'd)**

#### **A113.39.4 Payment Plans (Cont'd)**

**A. General (Cont'd)**

3. Rate stability for payment periods in excess of 60 months will be handled on an individual case basis.

**B. Additions to Existing Service**

1. Features may be added at any time under the following conditions:
  - a. Additions may be made depending on the availability of equipment.
  - b. Tariff rates currently in effect will be applied.
  - c. Additions may be made on a month to month basis or on a rate stabilized basis as long as the stabilized option is not for a payment period of shorter duration than the payment period associated with the original service.

**C. Expiration of Contract Period**

1. C.O. LAN customers may, upon the expiration of their contract:
  - a. Select a new contract period as offered in the current tariff, or
  - b. Revert to the current tariff rates for the monthly payment option.
2. A C.O. LAN customer may at any time during the selected contract period recast for an equal or longer contract period at the current tariff rates subject to the following conditions:
  - a. No credit will be given for payments made during the formerly selected period.
  - b. Nonrecurring charges will not be reapplied.
  - c. The new payment period begins with the date requested.
  - d. No termination charge applies for the former payment period.
  - e. A Service Charge will apply.

(T)

**D. Moves of Service**

1. A move of a customer's C.O. LAN Service to a location served by different central office switching equipment will be considered a termination of service at the existing location and the establishment of new service at the proposed location.

**E. Termination Charges**

1. Termination charges will apply for C.O. LAN Service under the rate stability option.  
These charges shall be equal to the sum of the rates for the remaining periods left in the contract.

**F. Supersedure**

1. Service may be transferred to a new customer at the same location upon prior written concurrence by the new customer. The new customer will be subject to all provisions currently in effect for the previous customer.

**G. Prepayment**

1. Subscribers electing to rate stabilize their service may prepay the total, or any portion thereof, of their recurring monthly rates. These requests will be handled on an individual case basis.

Note 1: This charge applies to changes to the options of existing asynchronous ports. If more than one option change is required on a given port, only one charge is applied to that port.

Note 2: This charge applies to the addition, deletion, or change of any asynchronous port group, private internodal trunk group, or service name.

## A113. OBSOLETE SERVICE OFFERINGS - MISCELLANEOUS SERVICE ARRANGEMENTS

### A113.58 Uniform Access Number (UAN)

(M)(T)

(Obsoleted 8-15-03, Type B. Not available for new installations, additions or on transfers of service to a new location.)

(N)

#### A113.58.1 Description of Service

(M)(T)

A. Uniform Access Number (UAN) is an optional service which provides the customer with a uniform Business Line Telephone Number for client access to the customer's service. The client will be able to dial one number from all locations within the specified area and the call can be routed to a specified customer location. UAN will be provided under the following terms and conditions.

(M)

1. UAN is available where facilities or arrangements permit. (M)
2. A UAN telephone number may not be accessed by 0+ or 1+ toll calls. Also, no operator assisted calls will be permitted to be placed to a UAN, nor will third party or collect toll calls be permitted to be billed to UANs. (M)
3. The assigned telephone number will have a dedicated NXX. (M)
4. UAN can be delivered through a line-side connection or a trunk-side connection as specified in A3.28 of this Tariff but not simultaneously for the same dedicated NXX number. A trunk-side connection is required if UAN is used with Automatic Number Identification (ANI). (M)
5. Line side connections are made through regular exchange access lines (by individual business lines, PBX trunks, etc.). Trunk side connections are made via a Trunk Side Access Facility. (M)
6. Nonrecurring Charges apply for each UAN per Traffic Operator Position System (TOPS) Tandem office. Where more than one UAN is established at the same TOPS Tandem location for the same customer and the UANs are ordered and installed at the same time the first nonrecurring charge rate element applies to the first UAN. Each additional UAN number will be billed at the additional service installed rate. The same nonrecurring charges and application apply per TOPS Tandem for UAN number changes requested by the customer subsequent to the original UAN assignment. (M)
7. Number changes required for Company reasons will not incur the Service Establishment Charge. (M)
8. A customer may reserve UANs to meet his specified growth requirements at specified locations. In the event the customer elects not to be provided with reserved UANs, assignment of these UANs cannot be assured. (M)
9. This service includes preassigned UANs. Such telephone numbers will be removed from reserved status and assigned as active UANs as requested by the customer. (M)
10. The assignment of UANs is made at the discretion of the Company. Special numbers are furnished subject to the availability of numbers. (M)
11. The service is furnished subject to the availability of UANs. (M)
12. Limitations and use of service as stated in Section A2. of this Tariff will apply. (M)
13. Calls to a disconnected UAN will be routed to intercept over announcement facilities; however, the announcement provided will not refer the caller to another telephone number. (M)
14. Directory Listing may be provided for UAN service at rates applicable for additional business or foreign listings as covered in Section A6. of this Tariff. (M)
15. No local measured or message rate service charges or long distance message telecommunications service charges (as provided in Section A18 of this Tariff) will be collected from end users for calls to a UAN customer. Long distance charges (Section A18) associated with calls to a Uniform Access Number will be reverse billed to the UAN customer. (M)
16. Access to UAN may not be available to certain classes of service. (M)

## A113. OBSOLETE SERVICE OFFERINGS - MISCELLANEOUS SERVICE ARRANGEMENTS

### A113.58 Uniform Access Number (UAN) (Cont'd)

(M)(T)

#### A113.58.2 Regulations

(M)(T)

- A. A UAN can be used only for one customer in an NPA. All usage will be combined and billed per account per Revenue Accounting Office. (M)
- B. The UAN monthly rate is applicable on a per telephone number per TOPS Tandem office basis. (M)
- C. The customer must be located within the same state as the TOPS office that is providing UAN Service. (M)
- D. UAN Service will be provided within a maximum of thirty (30) days after the customer's request for service has been processed in order to allow the Company sufficient time for implementation. (M)

#### A113.58.3 Reservation of Uniform Access Numbers

(M)(T)

- A. A customer may reserve UANs in NPAs where the customer does not have service in order to insure expansion to other areas with the same UAN; however, a customer must implement a UAN in at least one LATA in BellSouth territory in order to reserve the UAN in other NPAs. In the event that the customer elects not to be provided with reserved UANs, telephone numbers cannot be assured for the customers requirements in other NPAs. (M)
- B. The assignment of UANs is made at the discretion of the Company. Special numbers are furnished subject to the availability of numbers. (M)
- C. The service is furnished subject to the availability of UANs. (M)
- D. Calls to reserved (unassigned) UANs will be routed to recorded announcement facilities. (M)
- E. UANs furnished herein retain their reserve status until removed by the customer from the reserved status or assigned as a UAN at which time the service assumes rates and charges applicable to UAN. (M)
- F. Reservation of UAN rates will be billed until the UAN is removed from reserved status or billed as an active UAN in at least one LATA within an NPA. (M)
- G. A Secondary Service Charge per NPA is applicable in addition to the nonrecurring charge for reservation of UAN. (M)(T)
